

Apply Scary mole

Moles are

on the border

Cover the whole area where moles are present. The first application moves moles outside the area, while the second guarantees that moles will not enter the area for at least 45 days.

Day 1 - Cover the whole area, at least 10 m away from where holes and tunnels are visible, then water for 20 minutes.

After 2 weeks - Repeat as above.

inside the area

Set an exit point in the area and drive moles to that point.

Day 1 - Apply, starting 10 m from the damaged area, as far away as possible from the exit point. Then, water for 20 minutes.

After 3 days - Apply to the remaining part of the lawn, to keep pushing moles away from the area. Then, water for 20 minutes.

After 30 days - Apply a 10 m wide band all along the area borders, to prevent moles re-entry. Then, water for 20 minutes.
